Introduction. You have the message of the social policy-taking place in our country one of the priorities is small business and private entrepreneurship due to the development of population income and their standard of living it is considered to achieve an increase. As can be seen from the is being introduced in practice in this regard, at a low cost today in this area, it is possible to get a good income in a short period of time.

In particular today, there are several areas of the service sector, including, examples of communication, finance, transport, construction, tourism services and trade can be cited. Also family of residents living in the neighborhood development of entrepreneurship, including their craftsmanship, workmanship, efficient use of budding, small production, service and family entrepreneurship programs to facilitate other types of activities assistance in obtaining loans within the framework.

As a result, from the neighborhood not far away, setting up a small business, little in himself, family and territory the number of people employing members of well-off families has increased going. "Entrepreneurship in the neighborhood" of the head of State dated December 3, 2021 development, employment and poverty reduction decree on the priorities of state policy on its own it is important with the receipt on time. Services for residents to live in a comfortable and comfortable environment a number of facilities are being provided in the area. As a result of our country rural in exchange for the development of service infrastructure in rural areas the way of living of the inhabitants is approaching the way of living of the inhabitants of the city.

Literature analysis and methodology. By service, first of all, it is necessary to understand the product of Labor. This the main designation of the product is to satisfy the specific demand of people is understood. In other words, service is the need of people and it is an activity aimed at satisfying its requirements.

Kempell R., professor of economics at Nebraska State University, USA. McConnell and Washington state Pacific Lutheran University economics Professor Stanley L. Burglar's "Economics: principle, problem I political "in the" dictionary of concepts and terms the service is defined as "service is imperceptible (to the eye invisible) and something that has value in its place is the provision by the consumer, firm or government" [1].

Before we dwell on what is being done in this regard, our President Sh. We found it permissible to quote the following words of Sh.M.Mirziyoev: "from the assignment we are creating conditions before, we are allocating money. 500 to a single service sector giving a million dollars. If we use it honestly clean, how many thousand working places appears. Each minister is a patriot "pulling his chariot himself", when a given sum is appreciated and delivered to the place, people believe" [2].

Results. The development of the industry, based on the requirements of today's times President of the Republic of Uzbekistan "in 2017-2018. Program for the development of the service sector in the Republic of Uzbekistan the dam is dedicated to "GI as well as «providing services in rural areas from 2017-2019 and. additional measures for the rapid development of the service sector the resolution was adopted. Carried out in order to develop the services and service sector the share of the industry in GDP because of ongoing programs and measures has grown significantly. This figure was 50.5% in 2020 if today is expected to be 54,5%. Field band those make up more than 50% of the total busy population today. 80.4 of the small business entities operating today a thousand or 81% are active precisely in the service sector.

More than 2 thousand enterprises operating in the field of Republic within the framework of the program, is taking advantage of benefits. Implementation of programs total services charge on account of the increase of 1,7 times, services per capita while increased by 1.6 times. The main high pictures of development in the field are finance, construction, health storage, communication and information, computer programming, agriculture maintenance and repair of equipment and in household services observed [3].

Separately, it should be noted that the industry is affecting its growth one of the main factors is the creation into the field of small business amenities, facilities, favorable investment climate and commercial banks is the loan funds allocated by.

As an example, it can be said that operating in the field the subjects received 4 trillion 167.5 billion during the period 2015-2019. sum credit funds are allocated. Also social economic development of hides 51.9 thousand projects during the reporting period as a result of the implementation of their programs done.

In addition, in rural areas and on the basis of model projects development of the services and service sector in the built-up housing estates over the period from 2017 to 2019, more than 22 thousand projects were launched dropped. Approved by the decree of the president of the Republic of Uzbekistan dated January 26, 2019 PQ1046 "year of Rural Development and prosperity" the implementation in practice of all measures established in the state program, the population increased income and higher standard of living, rural further development of social infrastructure, modern infrastructure.

Organization of shops, creation of new jobs, service and further the service sector, the education system, the medical culture of the population paving the way for development. Further infrastructure

development has resulted in rural settlements being improving transport communications, providing clean drinking water, providing medical services, educational services, especially difficult to go telecommunications networks and post offices of remote rural settlements coverage work is developing with the connection [4].

On the development of the services sector and services in rural areas in a number of decisions adopted (No. 20 PQ-1041 of January 20, 2019, 26- No. PQ-1046 in January, No. PQ-1050 in January 28, March 17 No. PQ-No. 1073 to ensure the execution of the specified tasks Republic of Karakalpakstan by the Ministry of Economy in order The Council of ministers, together with the provincial governorates, as of 2019 regional development of the intended service and service sector changes were made to the program, development of services in rural areas additional tasks were adopted, creating favorable conditions for entrepreneurs in the villages, reducing the discrepancies between the city and the village measures were developed.

As a result of the establishment of rural infrastructures, the village modern and high-quality services are provided to residents and the current year by the end, more than 140 thousand jobs were created in this area alone intended to be made.

The implementation of additional measures prescribed in the program is general the image of the increase in the volume of services compared to 2018 To 123.4% instead of the 118.9% established by the president's decision PQ-640 gives the opportunity to grow. Due to the increased monitoring carried out the share of the volume of services provided to rural residents in this area. An increase of 26.8% to 30% is envisaged. Ongoing work the result is set for 4 months in the program in January-April of this year The forecast figure of 116.2% was fulfilled by 116.3%, shown in villages services accounted for 23.5% of the total volume of the Republic.

Discussion. Development of infrastructure in rural areas of the Republic great importance is given. Forecast in rural areas in the past period of the year 752 service stations are established under there were 1,561 chess pieces in practice. Including 501 retail department stores, 114 catering outlets, 4 "Guzar", 132 clothing sewing, 112 shoe repair workshops, 175 hairdressers, 50 photos, 19 bathrooms and 454 complex types of appliances equipment repair workshops and other service workshops was established. This is by Microkreditbank to the organization of stores 3.6 in January-April mlrd.so m, Labor and social protection of the population 1 from the" Employment " Fund under the ministry mlrd.so preferential close to credit funds are allocated.

As a result of the work carried out in January-April 2019 a total of 81,000 new jobs in the industry, including 58,7,000 in rural areas seats were created. By the end of 2019, the organization of Urban Spaces established in the program a total of 40,5 for the purpose of financial support mlrd.so ' m Capital investment, including Labor and social protection of the population from the" Employment "Fund under the Ministry of works-4.2 billion soums and From the fund "Microkreditbank" – 2.6 mlrd.so ' m, from other commercial banks 9.5 mlrd.so the provision of preferential loan funds is envisaged.

From this 24 crore to the establishment of external infrastructures. Sponsors close to the sum and entrepreneurs are intended to attract funds. Increased quality of services provided in villages, types due to the increase, the level of service use of the population has grown is getting. Considering this, 2 "Guzar" - type in each rural area it is envisaged that commercial and domestic complexes will be created. Practically of the current year during the previous period, 4 "Guzar" were built and put into use. In retail and catering systems in the Republic, the services provided are developing at high rates. Total the volume of merchandise in January-April 2019 is the same as in the previous year growing by 17.7%

compared to the period, 36% of the total commodity volume is rural coincides with places.

Increase in stationary stores from year to year as a result, the volume of retail merchandise achieved through them grew by 38.4%. Stationary in rural areas serving as of may 1 of this year the number of stores is more than 20 thousand, 40% of which are food products, 32% non-food goods and 28% mixed goods retail stores. Total sold per capita in the villages in January-April the volume of goods was 94 thousand rubles. Communication in rural areas and informatization, finance and banking services are developing more and more. As of may 1 of this year, there are a total of 367 in the Republic, including 87 providing postal services through information technology in rural areas post offices were established. The number of computer clubs is growing.

Electronic money transfer methods are developing. President of the Republic of Uzbekistan PQ-1046 of January 26, 2019 State “year of Rural Development and prosperity” approved by the decree of the number the program includes socially significant objects for the period 2019-2020 telephoning, such as 3,363 schools, 2,388 preschool institutions, 1,249 village doctor punts, 93 colleges and 70 hospitals telephony. The work carried out on these tasks in the current year the resulting communication and information service is defined in decision PQ-640 130% instead grows to 131.3%.

Blackbeard, Bell, Long, Sariasiya, Denov, Karmana, Navbahor, Tomdi, Boastanliq, Oqtosh, Kattaqurgan, Koson districts and other the districts have a total of more than 200 hard-to-reach and remote populations its points are covered by the traditional services of postal communication, 45 mobile post offices are established. A total of 75 telephone exchanges in the villages during the current year will be repaired. Communication, mail and informatization shown in rural areas the share of the total volume of services increases by 1.6%.
