Key words:

development, socio-economic, comfortable entrepreneurship, entrepreneurship, foreign investment;

Abstract

Today's in the day each how the country socio-economic the most basic of development factor as investments is being considered. That's why of the world many developed countries this the way through of the economy fast in paces to growth achieved of the country economy development first in the country work release and service show to the fields depends is considered And this by itself apparently as the economy development for in the country entrepreneurship development and comfortable entrepreneurship environment Create Demand will be done. to this road while fast and efficient the most important thing to achieve and simple the way this - to the economy active way investments attraction to do and of them efficient use is considered Our country President Shavkat Mirziyoyev telling as in the past: "World experience that's it shows which state active investment policy conducted if , own of the economy stable to growth achieved. That because of the investment economy driver, Uzbek in other words, the economy To say that his heart is an exaggeration will not. Investment with together different field and to sectors, regions new technologies, advanced experiences, high qualified specialists come in comes, entrepreneurship fast develops."

Today's in the day each how the country socio-economic the most basic of development factor as investments is being considered. That's why of the world many developed countries this the way through of the economy fast in paces to growth achieved of the country economy development first in the country work release and service show to the fields depends is considered And this by itself apparently as the economy development for in the country entrepreneurship development and comfortable entrepreneurship environment Create Demand will be done. to this road while fast and efficient the most important thing to achieve and simple the way this - to the economy active way investments attraction to do and of them efficient use is considered Our country President Shavkat Mirziyoyev telling as in the past: "World experience that's it shows which state active investment policy conducted if, own of the economy stable to growth achieved. That because of the investment economy driver, Uzbek in other words, the economy To say that his heart is an exaggeration will not. Investment with together different field and to sectors, regions new technologies, advanced experiences , high qualified specialists come in comes , entrepreneurship fast develops ." From this except Uzbekistan Republic " Uzbekistan Republic more development according to Actions strategy about". in the decree

investment according to the following priority directions marked : “ International economic cooperation more development , including the leader international and foreign financial institutions with connections expansion, thorough thought out external debts policy done increase continue carry out, attract done foreign investment and from loans efficient use ”.

Above set placed priority directions performance provided without national to our economy directly foreign investments volume increased is going In general investment activity done increase sources :

- of investors own financial resources ;
- debt received financial funds ;
- attraction done financial funds ;
- foreign the fifties funds ;
- Times budget funds.

In the country digital the economy in development foreign of investments efficiency increase and to the country foreign of investments come in to arrive size to increase directed the following suggestions to practice current to do to the goal according to is :

- republic economy directly capital funds wide attraction to do which provides legal , social and economic and another conditions regularly improvement;
- to our republic the world level technology delivered giving , of the economy modern content to the body to bring helping foreign to investors privilege and preferences present reach system improvement ;
- digital technologies to the economy take incoming foreign investors supporting support system more improvement ;
- energy thrifty and surroundings to the environment less harm deliver high technological , modern equipment installation; local to the circumstances suitable coming advanced foreign technologies app achieve , in ourselves being created inventions encourage and knowledge economy funds redirect . Summary in place to say maybe foreign investments of size increased to go country economy to development take going main of the factors is one Foreign investments with together to the country advanced ideas, new technologies and modern management principles come in will come And this foreign of investments in the country digital the economy to develop effect pointer efficient tool from being proof gives From this come came out without present in the day country in the economy foreign of investments size increase is most important current from issues one is¹considered.

Next in years In the Republic wide scope comfortable investment environment create , foreign investments , in particular , directly foreign investments attraction reach and appropriation according to measures done is increasing . As a result straight away foreign investments at the expense of funded 8 .0 trln. soum investments, or the corresponding year of 2021 period to the indicator by 4.0 % points increased without total in investments share by 15.9 % equal to Investments were absorbed 1. To fixed capital investments growth pace financing sources highest on indicator Water supply and sewage systems development fund funds at the expense of observed , corresponding to the previous year 2021 to the period compared to 2.2 times increased. Not guaranteed and another foreign investment and loans 13.6 trillion soum investments absorbed , total main to capital investments in size share of 2021 period to the indicator by 4.5% points increased to 27.3 % organize did Directly foreign investments attraction did without , new technologies current in progress, new kind of goods and services appear being , this goods and services quality more increase , ultimately of the population life quality increase , national in
